Sir:

In response to the Office Action mailed June 11, 2001, please amend the application as follows and consider the ensuing remarks.

IN THE CLAIMS:

Please amend the claims as follows:

1. (Three times amended) A process for converting a C₄+ naphtha hydrocarbon feed to a product which includes light olefins and aromatics, comprising:

01 contacting said feed with a catalyst comprising ZSM-5, ZSM-11 or combinations thereof treated with a phosphorus-containing compound, and a substantially inert matrix material, wherein said catalyst contains less than 20 wt% of active matrix material and has an initial silica/alumina molar ratio less than about 70, said contacting being effected under conditions to produce a product containing light olefins and aromatics.
